REZNIKOV YURI PETROVICH

Vice Dean of Medical Faculty,
Assistant of the Department of Pediatrics

Welcome to the National Medical University named after O. O. Bogomolets. As the Vice Dean of Medical Faculty, I am proud of the many ways we are bringing transformative medical education to the city of Kyiv. Over the past few years, we have witnessed an extraordinary level of growth and expansion, admitting the most competitive classes in our history, dramatically increasing our research footprint, becoming the Ukraine's first certified Medical Innovation Center of Excellence, and reimagining academic medicine for the twenty-first century. This state-of-the-art building houses our world-class laboratories, advanced experiential learning spaces, and high-tech research facilities.

Located in Kyiv city's beautiful wellness district, this flourishing metropolitan area offers students a pedestrian friendly lifestyle with charming restaurants and numerous recreation opportunities. And with its proximity to Kyiv Government Hospitals and other private health care centers for Advanced Medical Learning and Simulation, our students are equipped with the highest-quality resources to personalize their educational experience to reach their unique career goals.

Yet through all these achievements, we are more committed than ever to our singular mission of making life better through excellence in education, research, and patient care. The secret to our success is simple. We infuse our core values into everything we do. We embrace innovation to pioneer discoveries and integrate the latest technologies. We collaborate with our strategic partners to expand our clinical and research opportunities. And we champion interprofessionalism to enhance communication between physicians and improve patient outcomes.

For all these efforts, the National Medical University names after O. O. Bogomolets is ranked among the Top 10 medical universities in the nation by QS Top Universities Ranking and World Report. This is resounding evidence of the sustained and disciplined commitment of all our faculty and staff to excellence in everything.

Together, we are transforming medical education right here in the city of Kyiv. We are sure that once you spend a little time with us, you'll join us in our mission to 'Building a Healthy Tomorrow'.

ABOUT NMU

Bogomolets National Medical University is an ancient organization that was formed 180 years ago with the aim of providing excellence. National Medical University named after O. O. Bogomolets is acknowledged as a leading institution in Ukraine for preparation of citizens from Jordan, India, Syria, Lebanon, Saudi Arabia, Azerbaijan, Turkmenistan and others.

FACT

Professor V.O. Betz, head of department of anatomy(1868-1890), student of O.P. Walter, first described the giant cells of brain cortex(a.k.a. Betz cells), his unique collection of brain specimens(8000 units) was honored in Vienna at World exhibition at 1873.

PRACTICAL TRAINING

The University's clinical chairs in cooperation with medical and preventive institutions of the city of Kyiv have been performing a considerable volume of medical and consultative works. 53 clinical chairs of the National Medical University are located on 137 clinical facilities of medical and preventive institutions. On the annual basis, employees of clinical chairs of the University carry out treatment activities for more than 200 thousand patients, including more than 80 thousand patients requiring curative treatment. More than 60 thousand surgical and gynecological operations are conducted and 12 thousand deliveries are assisted. 34 thousand children are treated at the pediatric chairs.

The knowledge and skills, acquired during study at clinical and theoretical departments, are consolidated by the students during practical training, which is held in winter and in summer. The bases of practical training are over 200 most powerful medical preventive establishments in Kyiv, Stomatological medical center at NMU, 10 sanitary epidemic stations, 4 pharmaceutical plants, 7 pharmaceutical unions with tens of pharmacy stocks. About five thousands students in average pass through the practical training every year. The practice is managed by more than 280 experienced teachers of the university, which have the higher medical category and employees from practical health care with the corresponding qualifications – at training bases.

The students of medical psychological faculty pass through practical training due to curricula for training the specialists, approved by Ministry of Health of Ukraine, in summer after the second, third, fourth and fifth courses. The practical training is managed by two specialists at the same time: one – with clinical specialization, the second one – medical psychologist. In total amount of hours 40% from practical training is assigned to psychological aspects in the work of future medical psychologist.

Highly skilled teachers from medical university, at places – doctors of the first and high category are involved into practical training. The practical training on care for patients, practical training of medical nurse and medical practical training of students at medical psychological faculty is held at the bases of in-patients hospitals and polyclinics in c. Kyiv under supervision of teachers-specialists with appropriate specialization, as well as at specialized establishments that render the psychological and psychiatric care, under supervision of psychology and pedagogy departments and at the places – under supervision of doctors.

Using the facilities of the Stomatological Medical Center of NMU, a number of republican medical and methodological centers have been operating periodontology, neurostomatology, prevention of stomatological diseases. As of today, more than 300 jobs have been created, which results in ensuring individual practical activity of each student. Using the clinical chairs of the university, 9 republican and 20 city specialized centers coordinating activities of the inter-oblast centers, city hospitals, have been conducting their intensive works.
