WELCOME TO KYIV MEDICAL UNIVERSITY

Dear Friends!

Our University is one of the few private institutions of medical education in Ukraine. Since 1992, when Kyiv Medical University was founded, we were determined to achieve highest international standards of education and providing to our students only fundamental knowledge in medicine. We have succeeded in achieving this goal, which confirmed by recruiting our graduates by clinics in Ukraine and worldwide. Because many students of KMU are foreign, today we provide teaching at KMU in Ukrainian, Russian and English, that supplies the huge opportunities in international occupational cooperation. Starting from the 1st course our students have an access to modern medical knowledge by the international scientific libraries. Also we pay attention to the elective courses of folk medicine, like an ayurveda, homeopathy, yoga etc.

The university has the highest level of accreditation by the Ukrainian Ministry of Education and it recognised in the WHO's Avicenna directory of medical schools, colleges and universities as well as the International Medical Education Directory (IMED) of the United States among several other international regulatory bodies. Diplomas of Kyiv Medical University are recognised by the special medical councils of the lot of countries worldwide, including USA, Canada, UK and other. The curriculum and amount of educational hours of KMU's courses completely matches with EU standards of the medical education, which simplifies diploma nostrification of our graduates. From 2015 foreign graduates may get postgraduate education (e.g., internship) in Ukraine, in our university it is in best state and private clinics. Curriculum of KMU have a structure, which allows our graduates to be prepared to international certification exams.

The mission of our University is to create a team of professionals, directing and guiding their efforts at providing and ensuring possibilities for successful teaching of students, effective formation of student's medical professionalism and civil competence, skills in scientific research, abilities to accumulate and create new knowledge, the attribution to self-development and self-improvement, to student's professional growth and enhancement of their social status.

The University cherishes the finest overall civilizational and national values, moral and high medical ethics, complies with the principles of international conventions, forms student's and teacher's decency and accountability, justice and modesty, innovativeness and honesty, autonomy and sound teamwork, tolerance and wisdom.

Kyiv Medical University situated in the capital of Ukraine. Visiting here, you will be fascinated by the beauty of the ancient city of Kyiv, friendliness of its inhabitants, can get to know the unique Ukrainian culture – an integral part of the European Community.

WE LOOK FORWARD TO WELCOMING YOU IN KYIV MEDICAL UNIVERSITY!

Medicine at KMU

The university enjoys pardonable pride in being the only institute in Ukraine with a program that allows the students to have hands on practical training in the best private health care establishments in the country. The university co-operates with health care state of art facilities like BORIS, LISOD, CYBER CLINIC, SNYZHENKO, OBERIG, DOBROBUT, ISIDA for few to mention amongst others. This partnership helps us to give our graduates a feel of real time modern health care establishments while still being in their undergraduate years.

Kyiv Medical University not only uses all the traditional processes of imparting education as in classroom discussions, lectures, seminars, consultation classes, workshops, practical training, individual works and projects but also tries to achieve maximum efficiency out of these processes with a low teacher-student

ratio, generally 1 :12 ratio, week-end consultations enabling students to clarify their doubts in any discipline, discussion groups, licensing exams targeted training, etc.

Lectures are the primary form of training sessions which are intended to impart theoretical know how of the discipline with the use of the lecturer's experience in the subject as well as modern multimedia presentations. Practical classes are more specific in their approach, discuss the topic presented in the lecture of a particular discipline along with its practical

implications, and develops the ability to use the knowledge presented in the lecture in a practical scenario. This form of training includes training with the cadavers, and various experiments wherever required.

Seminars are another form of training sessions where input of fellow colleagues in forms of debates and discussion is organized under watch of an expert medical teacher to instill confidence of each participant in the topic and to come up with as many questions as possible to have the in depth knowledge of the subject.

Courses

General Medicine Faculty

General Medicine is the art and science of medicine in which the practitioner deals with the nonsurgical treatment of diseases of the internal organs of human body. We offer both undergraduate and postgraduate courses on General Medicine in English, Russian and Ukrainian languages. Our reputation of excellence teaching attracts students to an extensive range of programmes delivered by world class recognized clinicians and academics.

Undergraduate Courses

The undergraduate course at KMU takes 6 years and the successful students is awarded a medical degree for MD(Doctor of Medicine) or MBBS. During the initial stage students are taught the basic fundamentals of

medicines. Students begin their clinical studies from second year. Our graduating certificates are attested by the Ministry of Health of Ukraine.

Postgraduate Courses

We offer Postgraduate courses for Clinical Residency, Masters Course, Doctoral Courses. The duration of courses depends upon the course selected by the students; generally the year varies from 2 to 3 years. To successful completion of the course appropriate level of mastery in Russian language is mandatory.

Courses

Preparatory Faculty

Pre-medical course was recognized as the first stage towards the formation of a real international student body. This curriculum allows the matriculation of students forming around the world in spite of the individual disparity of the educational system in their home country.

After successfully clearing the examination of preparatory course, students receives the Certificate of the Preparatory Faculty. This certificate enables the students to study further in their selective field or stream of specialization such as; Medical, Engineering, Aviation, Economics, Maritime & Environmental education in Russian or Ukrainian medium of training.

In the process of learning the preparatory faculty course students will come to learn about the Russian or Ukrainian language (optional) and some special subjects too which are generally necessary for the further learning of their stream. These topics can be Computer Science, Science, Mathematics, Literature, Physics, Chemistry, Biology, History and Geography.

Students who enrolled into the pre-medical program with the expectations of eventually being accepted

into college/university of medicine in KMU having science (should have passed in science, mathematics, English and any other three subjects) are eligible to this program.

Post Graduate Education

Postgraduate education of specialization of doctors and pharmacists is carried out in the internship here at KMU, Master's degree program, other programs in clinical residency and the courses of second specialization of doctors is also carried out here.

Training of doctors and specialization of high qualified students and candidates as doctors of medicine at the university is carried out as post-graduate and doctoral candidacy and within the institution of recipients.

Internship is generally an obligatory form of postgraduate program of higher study for doctors and pharmacists as the primary specialization, which means elevating the level of practical training and providing the

occupational strength for autonomous medical practice of specialists due to main medical and pharmaceutical specialties, firmed by the subsequent orders of Ukraine.

For the training in internship, duration for a student to practice is about of 1-3 years and is outlined by the Ministry of Health of Ukraine varying on the fact of the specialization in a filed.

Clinical Residency

This is the highest form of training medical students as specialists with particular specialization. Medical Training is carried out at both the regular form as well as distance or discontinued work within the following specialties; Obstetrics and Gynecology, Therapy, Surgery, Neurosurgery, Urology, Oncology, Pediatric Surgery, Pediatrics, Cardiology, Rheumatology, Endocrinology, Neurology, Psychiatry, Ophthalmology, Otolaryngology, Dermato-venereology, Traumatology and Orthopedics, Therapeutic Dentistry, Surgical Dentistry, Prosthetic Dentistry, Pediatric Therapeutic Dentistry, Orthodontics, Radiology, Roentgenology, Physiotherapy and Sports Medicine, Forensic Medicine, Phthisiology, Pathology, Clinical Immunology, Anesthesiology and Intensive Care.

International Faculty

Life of International students in Kyiv does not seem to have any difference from that in other parts of the world. Most of the student's life in Kyiv is pretty much about studying & staying healthy which helps other foreign students to set themselves at the same environment. Mostly two types of students' lives in Kyiv: Those who have grown up and live in the city and those who come to study from the foreign countries so there is built-in environment for the students to study here with full enjoyment and dedication. There are footballs, basketball and other sports clubs for students, where they will have the opportunity to get develop with physical strengths.

It is generally believed that students who come to stay in Kyiv have a more secure and comfortable life than other places of Ukraine. There are dormitory houses for students who do not have much of financial strength but

compound is located on the outskirts of the city which is near away from Kyiv and can be reached with the help of public transportation.

For the ease of students, University built a model dormitory building that encourage students to live inside the campus. This hotel-style dormitory is different from the present buildings of this University and is well appreciated among students. Hostel has different types of room configurations and generally the international students are offered rooms according to their choice and convenience. Hostel also has round the clock security provision for safety of every student staying in the hostel.

it's a fact of Kyiv that Two-thirds of all students from Kyiv University live in dorms and thus they do not meet the satisfactory yet unreasonable standards of living. Nonetheless, this gives students a way of living independently which provides them more freedom and a way to experience the life of being a student in different ways.

To find living places for students in Kyiv students can contact local rental-housing property owner which are available almost at every place in Kyiv. Although there is a student housing district for the students of Kyiv University, which is also home for the non-resident Kyiv State University's students. This student housing

Accreditation

Kyiv Medical University is accredited by the Ministry of Education and Science of Ukraine with Level IV the highest level of accreditation for a higher educational Institute in Ukraine.

Life in the city of Kyiv

Kyiv, the capital city of Ukraine is perfect blend of old and new, east and west. Kyiv has old rich history associated with it. Many a times what is most lucrative about a place may be its history part along with extremely modern outlook. Old beauty is visible in its culture and UNESCO world heritage sites with splendid golden and domed churches. Kyiv is one of the oldest cities in eastern Europe and its history goes back to 5th century.

Kyiv is less expensive than any other European city outside Ukraine. In modern times Kyiv has emerged as one of the best tourism place in Europe. As Ukraine is going through a development shift big time so is Kyiv.

Kyiv, the crown jewel of Europe presents all its residents with all the facilities in any capital city of a country. The city has its own charm with its multicultural environment. The city is packed with bus and has everything in its arsenal to cater to the taste of its patrons shall it be hopping malls, museums, restaurants, theatres, cinemas, sports centers and night life.

Kyiv city residents are very polite and friendly and love to interact with people of different ethnic groups. The city offers the students an unmatched cultural environment where they can interact not only with people from their own country but also from more than 60 countries in the world.

Hostel Facilities

Kyiv Medical University has its own hostel accommodation for all its students.

The student dormitory enables students to access a lot of facilities and activities. The comfortable environment at the hostel makes it like a second home for the students in a small amount of time.

Students from all over the world come, live, study and interact at Kyiv medical University hence the facilities are provided as per international standard. All the rooms have different configurations like double and triple sharing basis and international students get to choose the rooms as per their convenience.

Hostel also has the following facilities:

- Laundry
- Cafeteria
- Reading room with free internet
- Assembly hall
- Male and Female separate shower rooms
- Kitchen and separate wash rooms.

Hostel at Kyiv medical University is located very close to the college campus and is a 7 min walk from the main campus.

It is well connected to all the basic provisions like Metro, Bus stops, Super Markets and other convenience stores.

Hostel also has round the clock security and assistance for safety of every student staying in the hostel.

Students at Kyiv medical University get well-equipped assistance from their seniors as well and peaceful environment is ensured at both campus and hostel.

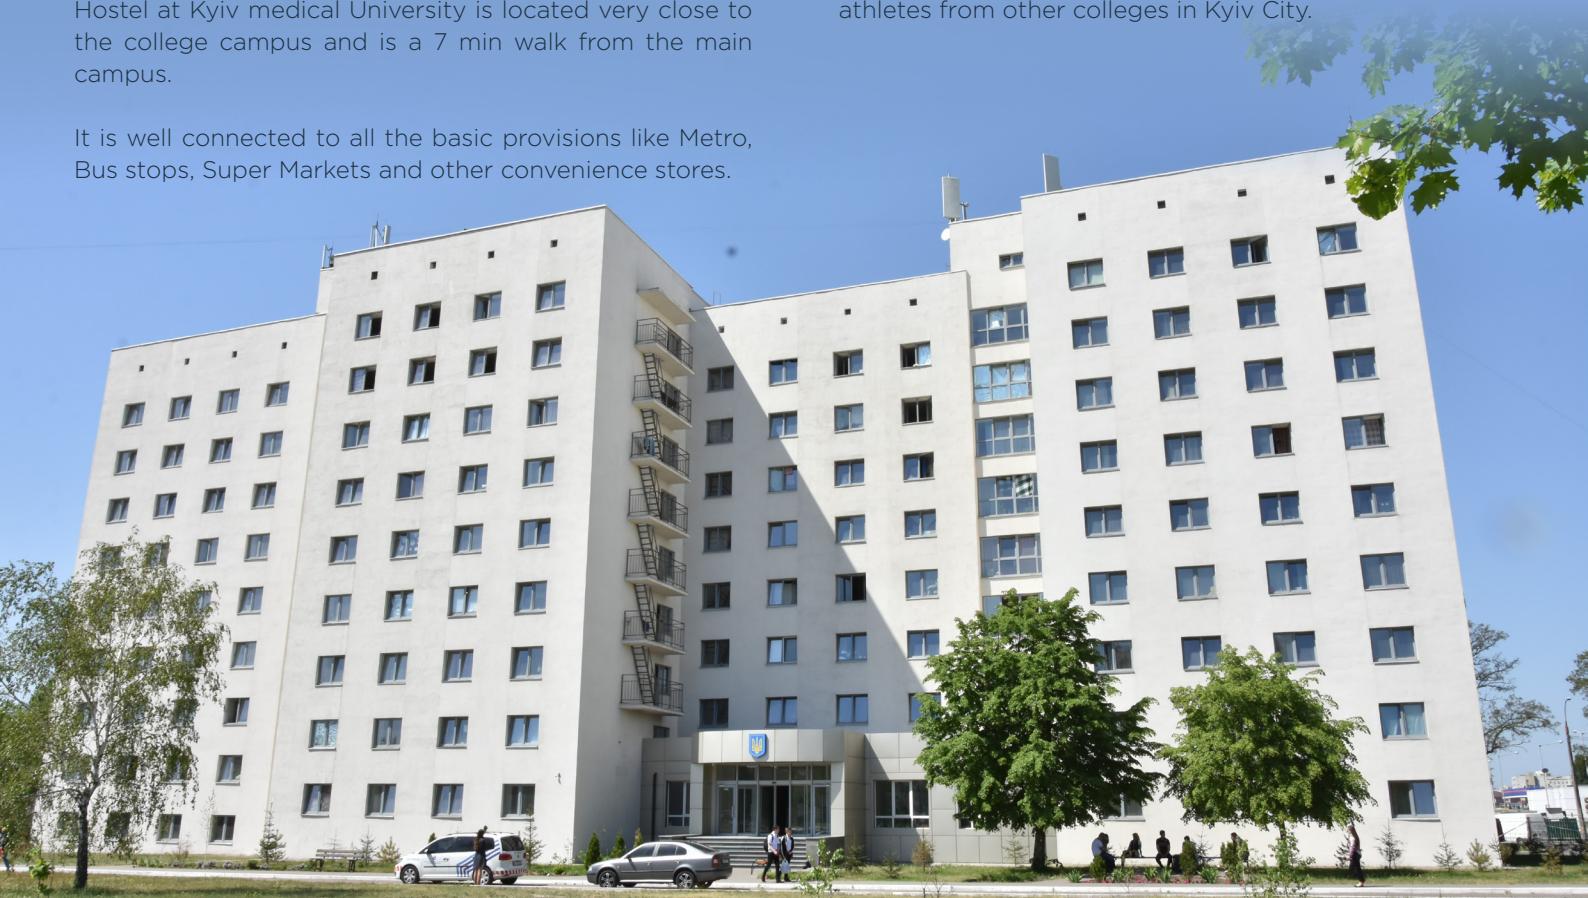

Sports and Recreational Activities

Students at Kyiv medical University have the opportunity to attend the Institute pool, gym, to help them in the development of the individual and seasoning physically

There are cricket, basketball, football and other sports clubs where students can play for fun or participate in competitions.

During the academic year numerous tours and events are conducted for students that allow them to learn about the history and cultural life of the capital of Ukraine and experience its classical and contemporary art.

Kyiv Medical University also participates in sports day organized by the Kyiv city organization along with athletes from other colleges in Kyiv City.
